

Stunning Green AMENITY DECKS

BENEFITS OF ADDING 'GREEN' TO YOUR AMENITY DECK

- Provide tenants with access to plants and nature in an urban environment
- Creates a relaxing outdoor gathering space for social cohesion or quiet contemplation
- Promote Wellness: Views of vegetated roofs have been shown to reduce stress levels
- Rooftop landscaping spaces can be used for urban agriculture and gardening
- Amenity decks are considered more desirable by tenants, bringing increased rents and occupancy rates
- Green roofs can help contribute toward 14 or more LEED points

The Intensive Layered system for amenity decks is designed for rooftop landscapes with perennials, shrubs, and trees. Our intensive blend media is engineered to ensure these plants thrive long term. The system consists of a drainage layer, filtration layer, and optional water retention layer. It can be used in any landscape design, and in large garden containers and rooftop planters.

Why Columbia Green?

- Comprehensive green roof solutions; from Extensive to Intensive
- Layered and Tray-based systems
- Multiple warranty options including Single-Source Warranty provided through our Roofing Partners
- Stormwater retention calculations custom to your unique project

“We have received nothing but glowing comments, with everyone saying this is the best green roof that they have ever seen.”

— Julie Currier Vice President, Development | Unico Properties

“As a biophilic design tactic, green roofs provide an essential connection between the built and natural environment. In addition to offering relaxing spaces our tenants enjoy, green roofs can support the regeneration of more robust urban ecosystems and the mitigation of storm water runoff.”

— Ben Myers Sustainability Manager | Boston Properties

TYPICAL AMENITY DECK DETAIL

GREEN ROOF AND AMENITY DECK FAQ's

What makes the Columbia Green system unique?

Columbia Green provides a turn-key green roof solution giving building owners both lower installation cost and lower long term maintenance and operating expenditures **reducing the total cost of ownership.**

What types of systems does Columbia Green provide?

Columbia Green offers layered and tray based flexible design solutions from high-end amenity deck planting systems to shallow 'extensive' sedum roofs.

Can your systems be installed on existing buildings?

Yes! Depending on the structural conditions, our lightweight green roof systems can be added to existing buildings with minimal additional upgrades.

What warranties are available?

There are two types of warranties, Full System warranties that cover the roof membrane and green roof separately and Single Source Warranties that cover protection for the entire roof system together. Columbia Green provides both types.

How heavy are your amenity deck systems?

Weight can vary according to media depth. Go to our website, or contact us for project specific weight information
