

Make your ROOF a Detention Tank

King George Hub Phase D
Surrey, BC

INNOVATIVE SOLUTIONS: A GREEN ROOF / 'BLUE ROOF' SYSTEM

Columbia Green's Water Storage Units provide a rooftop detention area underneath our Tray and Layered Green Roofs. Maximize your rooftop for stormwater management. You can 'green' the rooftop, AND provide additional stormwater detention below the green roof.

- 4 in" height Water Storage Units are stackable and designed to be used with a control flow roof drain.
- Lightweight, Easy installation
- 94% Open for Water Storage
- Select a roof assembly designed for wet conditions. Contact Columbia Green for manufacturer recommendations
- Overburden Removal/Replacement Warranty options

*"We were impressed with the **Columbia Green Water Storage Unit** and how easy it was to work with and install this product. They were able to meet our budgets and tight schedule and would highly recommend to others,"* Brandon Nicolai, Project Lead Holland

Landscapers
