

LIGHTWEIGHT • DURABLE • FLEXIBLE • BEAUTIFUL • AFFORDABLE

Columbia Green Technologies **PLANTER ASSEMBLIES**

*Introducing our Custom Metal Planters for Amenity Decks,
on-Podium, Bioretention and at-Grade Installations*

- *Lightweight* Our aluminum planters are designed for both on the ground and on structure. Sturdy, while light enough to not exceed building weight limits.
- *Durable* Made from heavy-gage, marine grade aluminum or steel. Made to resist UV radiation and severe weather. Can even be used for bioretention planters.
- *Flexible* Your imagination is the limit- Custom sizes, colors, curves and shapes and drain locations. Link them!
- *Beautiful* High quality manufacturing with carefully welded or bent seams. Powder coated with an array of standard colors, or custom colors.
- *Affordable* Get custom planters for an economical price. Our planters have shorter lead time as all manufacturing is done in-house.

*Planter Assemblies include our
lightweight planter media.*

LINK EDGER

open-bottom planter or edging

TYPICAL PLANTER INTERIOR DETAIL

ABOUT OUR GREEN SYSTEMS:

What makes the Columbia Green system unique?

Columbia Green provides planter assemblies that include lightweight planter media, providing a turn-key manufactured vegetated system and warranty for the building owner.

What types of systems do you offer?

Columbia Green offers layered, tray, blue-roof/green roof systems, and planter-based flexible solutions for above-structure or at-grade applications.

Can you also supply Pavers and Geofoam?

Yes! We sell a variety of pavers and pedestals along with XPS thermal insulation, EPS Geofoam and Recycled Foam Glass Aggregate Fill that can be packaged together with our Columbia Green Warranty.
